

KGS Software GmbH receives first CMIS certification from SAP

After joint pilot phase, SAP Integration Certification Center (ICC) now offers certification of CMIS interfaces

Neu-Isenburg, August 10, 2022 - As a long-standing SAP partner, KGS Software GmbH has helped in the development of the process for SAP CMIS certification as part of a pilot project and is now the first recipient of this coveted certificate. This makes the Neu-Isenburg software company the first solution provider whose interface carries SAP's official CMIS certificate.

Within the framework of a close cooperation, the specialists from kgs and SAP developed the process required to thoroughly evaluate an interface in terms of its CMIS capability in the past weeks. The joint task included the design and review of the entire process, from start to end. The first step was the functional review of the products and the CMIS interface. The second step was the end-to-end process including S/4HANA configuration and the setting up of an archive in the cloud.

Benny Schröder, Head of Development & Delivery at KGS Software GmbH and in charge of the CMIS project with SAP: "Our long-standing and trusting partnership with SAP was the reason we jointly developed and reviewed this certification process. Now other companies also have the opportunity to have interfaces tested for CMIS suitability here via the SAP Integration Certification Center (ICC) and to receive the corresponding certification from SAP."

At SAP, it is assumed that the new CMIS certification will now be requested by many companies, also because these companies - like kgs is now - will then be listed in the SAP Certified Solutions Directory.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
