

tia® H5 Viewer

FEATURES

- Browser-based viewer with annotation function
- Supported formats: PDF, TIFF, JPEG
- Simple intergration into the existing SAP-landscape
- Two language versions (English and German) available in the standard version; other languages on request
- No need to install anything on local workstations
- View documents either directly in the browser or in the SAP workspace
- Extensive annotation functions
- Annotations are stored in the archive as separate document component

BENEFITS

Highlights

- Display PDF and image documents
- Multible configuration within one Servlet
- Customizing in the SAP central instance
- Call based on content repositories / used document type via overlay
- Annotations via overlay
- Can be used with any SAP ArchiveLink® certified archive system

Displaying PDF and image documents

tia® H5 Viewer is a software application developed in Java® for displaying PDF and image documents in an internet browser. It is operated and managed as a servlet within a web server runtime environment. No additional software components such as Java or browser add-ons need to be installed on the client's workstation computer.

Annotations

By using an overlay function, you can attach annotations in the form of sticky notes or texts, mark text using a virtual highlighter, or draw rectangles, circles and lines. Printing the document with or without the annotation overlay is supported. All annotations are stored in one separate component in the archive.

Multiple configurations within one servlet

tia® H5 Viewer allows you to set up multiple configurations within a servlet. It can be adjusted and used in this way. When documents are called up from SAP the viewer starts in the browser and shows the

stored documents as well as any annotations. You control the process by customising in the SAP Central instance. The call-up process can be adjusted on the basis of the content repository up to the technical document type used. The tia® H5 Viewer can be used with every ArchiveLink® certified SAP archive.

About kgs:

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
