

tia® Migartion

FEATURES

- Controlled management of document and data migrations for SAP archives
- Full access to documents throughout the duration of the migration through proxy server functionality
- Transparent document access for the end user; no impact on business processes
- Fully automated documentation of migration ensures conformity to generally accepted accounting principles
- Proactive monitoring with e-mail notification of errors
- Administration via web client
- Fully automatic restart following a system interruption
- Verification option by comparison of samples
- Highly parallel execution of the migration process; interactive control of the migration process while migration in progress
- SAP security support to ensure secure communication with legacy archive system
- Zero performance impact on production SAP system

BENEFITS

- Immediate use of the target archive and seamless access to legacy archive
- Intuitive control and configuration
- Complete traceability of the migration process down to document-level
- Full migration status reports at any time
- Minimization of migration risks throughout
- Fully automated documentation of the migration process
- Support of SAP work items & barcode documents
- Compatible with all SAP ArchiveLink®-certified archives
- Minimal administrative effort

Highlights

- ArchiveLink® and BC-ILM-based middleware for document and data migrations
- Consistent document access during the entire migration phase thanks to proxy-server function
- GOBS-compliant migration
- Interactive migration management
- Compatible with all SAP ArchiveLink®-/SAP ILM-certified archiving/ECM systems

Migration solution for SAP archives

tia® Migration is a tool for the easy and controlled migration of SAP archive data and documents. With the advent of electronic archives came the need for document migrations, for instance to switch to new storage systems/media or to replace an entire archiving system. tia® Migration allows you to perform such migrations via a web client regardless of which archiving solution you are utilizing. The process is simple, fast and requires very little administrative intervention.

User-friendly design

Archive migrations should neither be complicated nor should they entail any risks. What sets tia® Migration apart from traditional migration solutions is that it enables companies to immediately and smoothly change over to a new target archive. The migration is executed transparently using a proxy server-based process that does not disrupt user activities.

Security and control

A web client interface provides authorized users with simple access to detailed status and progress reports on the migration process. Additional features include error reporting as well as intuitive configuration, control and migration management functions. Transparent audit trails and an automatic step-by-step documentation of all migrations, traceable down to individual documents, allow you to execute migrations in line with generally accepted accounting principles and ensure compliance with regulatory and legal provisions.

About kgs:

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
