

tia® Web Service

FEATURES

- SOAP WEBSERVICE for accessing ECM/DM/ archiving systems via ArchiveLink®
- For use with any platform (Windows and Linux)
- Low resource requirements
- Support for document and storage and research
- Secure communication (HTTPS, encrypted URLs, authentication certificates)

BENEFITS

- Licensing model is user independent
- Can be used with any ECM/DM/archiving systems compatible with ArchiveLink®
- Easy implementation
- Designed for high data throughput and parallel access

tia® Web Service - Universal archive connection via standard interface

Highlights

- Web Service, the ArchiveLink® that makes standard archive interfaces available for all applications.
- Can be used on different platforms
- Tried and tested technology (SOAP)
- Easy to use: can be implemented without assistance from the manufacturer
- Fully scalable
- Encrypted communication
- Authentication with certificates

Individual solutions and legacy systems linked to one archive system

Standardisation of the archive interface reduces the risks associated with projects of this kind. ArchiveLink® is the standard on the market for easy, high-performance archive connection. Thanks to tia® Web Service, this can now also be used with any system outside of SAP. The tia® Web Service fully encapsulates the ArchiveLink® protocol and reduces it to simple commands such as 'get', 'put', and 'delete'. Communication via this network is secured with encryption and certificates, eliminating the possibility of unauthorised access.

Connection of web portals

SAP archives can easily be connected into a web portal on the intranet or extranet without any licence risks using the kgs WebAPI and its Web Service.

Easy management of documents

The only requirement for using the tia® Web-Service is that the connected application must be able to manage two additional metadata per document. These are the unique document ID and the repository name. Documents can be accessed directly and clearly using just these two criteria.

About kgs:

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
