Neu-Isenburg, May 15, 2025 – On Tuesday, June 3, 2025, at 11:00 a.m.

Stefan Hummel from Kärcher together with Alexander Mex from KGS Software GmbH, will present in a free webinar how the internationally leading provider of cleaning systems successfully replaced its ECM system with a lean archive in the AWS Private Cloud.

Concrete real-world reference examples are the best blueprints for successful follow-up or new projects. All the more reason to be pleased that Kärcher's IT managers have agreed to share their experiences of transforming their archive into the cloud with others. With this, Kärcher aims to demonstrate that even seemingly complex transformation projects can be successfully implemented with the right approach.

In the webinar titled "Kärcher Case Study: Migrating an Archive in the Context of the S/4HANA Transformation," participants will gain first-hand insights into the company's initial situation, the challenges that had to be overcome, and the reasons for undertaking the migration. Stefan Hummel will also reveal which strategic goals were involved and how Kärcher's IT architecture has evolved since the transformation. As Hummel summarizes: "The solution from kgs is lean, fast, and integrates very well with a hyperscaler. The overhead of the previous solution – with its own database and complex administration – is completely eliminated with kgs."

KGS Software GmbH

KGS Software GmbH has been a leader in SAP archiving for over 25 years, offering the highest level of expertise. Leading companies worldwide – such as Lufthansa Group, Procter & Gamble, BMW, and Kärcher – rely on kgs solutions. Data, documents and attachments from SAP, as well as attachments from other leading applications like Microsoft SharePoint, are migrated and archived using cloud-native, high-performance software.

Under the brand "tia®" – the intelligent archive – kgs unites all product modules under a common vision of the intelligent document archive. tia® stands for autonomous archiving, is compatible with any applications, storage solutions, and cloud technologies, and provides companies with a Single Point of Truth (SPoT) for document access. tia® supports the SAP certified interfaces ArchiveLink®, ILM, and CMIS. With the world's first SAP-certified CMIS interface, kgs' technological leadership in document management was once again confirmed in 2022.

kgs is headquartered in Neu-Isenburg near Frankfurt am Main, with a branch in Atlanta, Georgia. www.kgs-software.com
