Neu-Isenburg, March 19, 2025 – At the DSAG Technology Days 2025, taking place on April 2-3, 2025, at the RheinMain Congress Center in Wiesbaden, KGS Software GmbH will be present with an exhibition booth as well as an expert presentation alongside Kärcher.

Under the theme "Strategy Royale – Call, Raise or Fold", this specialist congress focuses on the exchange of knowledge around SAP software and IT partner solutions. It's not just about having the right cards—meaning the right technologies – but also about ensuring that selecting and implementing them doesn't become a game of chance.

"Migrating an archive to the cloud is a strategic decision that requires careful planning and reliable execution. We are proud not only to have recently welcomed Kärcher as a customer, but also to have achieved cost savings of around 50% for the company through the implementation of our archiving solution tia®. Together with Kärcher, we will present the key steps that made this success possible," says Johanna Zinn, Head of Marketing at KGS Software GmbH.

The highly anticipated presentation, titled "Kärcher Future Ready: Migration of an Archive for the S/4HANA Transformation," will be delivered by Stefan Hummel and Alexander Mex on the second day of the congress. The session will take place at 2:00 PM in Room E | V083. Attendees can also look forward to the kgs giveaway, with a grand prize that perfectly aligns with the customer presentation.

KGS Software GmbH

KGS Software GmbH has been a leader in SAP archiving for over 25 years, offering the highest level of expertise. Leading companies worldwide – such as Lufthansa Group, Procter & Gamble, BMW, and Kärcher – rely on kgs solutions. Data, documents and attachments from SAP, as well as attachments from other leading applications like Microsoft SharePoint, are migrated and archived using cloud-native, high-performance software.

Under the brand "tia®" – the intelligent archive – kgs unites all product modules under a common vision of the intelligent document archive. tia® stands for autonomous archiving, is compatible with any applications, storage solutions, and cloud technologies, and provides companies with a Single Point of Truth (SPoT) for document access. tia® supports the SAP certified interfaces ArchiveLink®, ILM, and CMIS. With the world's first SAP-certified CMIS interface, kgs' technological leadership in document management was once again confirmed in 2022.

kgs is headquartered in Neu-Isenburg near Frankfurt am Main, with a branch in Atlanta, Georgia. www.kgs-software.com
