Neu-Isenburg, October 16th, 2025 – On October 23, 2025, at 11:00 a.m. (CET), KGS Software GmbH will host a webinar showcasing innovative approaches and alternatives to using the SAP Content Server within the SAP PLM environment. The session will focus on technical optimization, performance gains, and cost efficiency in modern archiving architectures.

Within Product Lifecycle Management (PLM), CAD files and technical documents are critical assets – yet they often lead to high system loads, complex data structures, and increasing infrastructure costs.

An intelligent archiving solution directly tackles these challenges: it offloads the database layer, accelerates access times, and enables resource-efficient management of large document volumes – particularly in hybrid and cloud-based SAP landscapes. The widely used SAP Content Server is increasingly approaching its technical and economic limits in these contexts.

In the #funfastfocus webinar *“Performance Booster for SAP PLM”*, Benny Schröder, CTO of KGS Software GmbH, will demonstrate how the tia® Content Server and tia® Cache Server can help create high-performance, scalable, and cost-efficient archiving architectures.

The goal: to future-proof SAP PLM environments by transforming data-heavy storage structures into lean, high-performance, and low-maintenance solutions.

Further information and the registration form can be found [here](#).

KGS Software GmbH

KGS Software GmbH has been a leader in SAP archiving for over 25 years, offering the highest level of expertise. Leading companies worldwide – such as Lufthansa Group, Procter & Gamble, BMW, and Kärcher – rely on kgs solutions. Data, documents and attachments from SAP, as well as attachments from other leading applications like Microsoft SharePoint, are migrated and archived using cloud-native, high-performance software.

Under the brand "tia®" – the intelligent archive – kgs unites all product modules under a common vision of the intelligent document archive. tia® stands for autonomous archiving, is compatible with any applications, storage solutions, and cloud technologies, and provides companies with a Single Point of Truth (SPoT) for document access. tia® supports the SAP certified interfaces ArchiveLink®, ILM, and CMIS. With the world's first SAP-certified CMIS interface, kgs' technological leadership in document management was once again confirmed in 2022.

kgs is headquartered in Neu-Isenburg near Frankfurt am Main, with a branch in Atlanta, Georgia. www.kgs-software.com
