

Webinar: Goodbye ArchiveLink, hello CMIS - and how?

Tips & Tricks for Future-Oriented Archiving in SAP

On Friday, 5 February 2021, kgs invites you to a free practical webinar at 10 am. In it, Benny Schröder, Head of R&D at kgs, will present how an ArchiveLink landscape can be transformed into a CMIS-ready system with kgs tia®.

There is little public information about how SAP envisions the future in terms of document management, archiving, ArchiveLink, CMIS and cloud platform. Yet it is precisely this information that is indispensable for companies to be able to set up their IT architecture or processes in a future-proof way.

The Silver Partnership between SAP and kgs, which has existed for more than twenty years, has resulted in a knowledge advantage, which kgs translates into practice in a webinar for SAP managers, with a concrete tool, timetable and outlook. CMIS (Content Management Interoperability Services), the independent interface standard optimised for the cloud, with which content management functions can be fully mapped, is of central importance. Participants in the 45-minute webinar will learn first-hand how they can gradually transfer ArchiveLink documents to the new standard and what added value this will bring for companies. Afterwards, there will be an opportunity to ask the experts questions.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
