

press release

tia® Content Server and tia® Migration are available in the SAP Store

There's already an even more straightforward way for SAP clients to find out about KGS's smart archiving solutions, and acquire them

Neu-Isenburg, 8th August 2021 – SAP® Silver Partner kgs, together with its products, is represented with immediate effect on [SAP Store](#). It's tia® Content Server and tia® Migration that set the pace.

Winfried Althaus, MD of KGS Software GmbH, says: "We are glad that SAP clients now have an even more straightforward way of finding out about kgs's solutions and that they can order them. Thanks to our many years of trust-based partnership and our Silver status, SAP has incorporated our products into its Store. This means that any companies who are interested can gain an overview of our portfolio – and become actively involved. tia® Content Server and tia® Migration are available at this initial stage. Further products will follow before long."

tia® Content Server is a high-performance archive which was developed specifically to cater for the needs of SAP archiving. The SAP archiving system – being a thin solution – enables legally safe document archiving, data archiving and the archiving of print lists via the ArchiveLink® SAP standard interfaces, the new cloud-optimised CMIS standard and for SAP BC-ILM. And also by means of S/4HANA, of course.

tia Migration® enables a straightforward, monitored procedure for archive migrations in the SAP environment. Accordingly, there is no problem in migrating data and documents – which have become necessary since the introduction of electronic archives – for example if any storage systems or media have to be changed over, or if entire archiving systems have to be discontinued.

In addition to kgs's solutions, the SAP store offers more than 1800 solutions from SAP and from other partners. In-store, clients can search for their solutions; they can test them, purchase them and update them. Jochen Heybrock, who is responsible for partner management at kgs, said: "The fact that our products can now be acquired via the SAP Store strengthens our partnership and underscores their status from SAP's viewpoint. What is more, it makes it easier for SAP's clients to deploy their IT strategies. In-store, they can immediately see which supplementary SAP solutions are supported and how they supplement the functionalities in the SAP universe. Specifically in the SAP Store: For each purchase made, SAP plants a tree.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
