

SAP Expertentalk - DMS goes CMIS

Webinar on the latest trends in document management

On Friday, July 30, 2021, takes the next webinar in the #FunFastFocus series from kgs at 10 am. Place. This time, the topic is the CMIS interface and its relevance for document management in SAP.

In recent months, the CMIS interface has morphed from a niche solution to a standard approach. Even SAP is already relying on this cloud-optimized interface standard. However, so far little has leaked out about the concrete plans being pursued in Walldorf with regard to document management, CMIS, ArchiveLink and the like.

In the webinar "DMS goes CMIS: Expert Talk with SAP", Markus Pipp, SAP Product Management - SAP S/4HANA, ECM, and Benny Schröder, kgs Head of R&D, provide information about the current status with regard to CMIS and SAP and show what changes can be expected in the future. The webinar offers an insight into the status quo around document management and archiving in as well as the future of CMIS. In addition, the technical infrastructure of kgs tia® will be presented and it will be explained why the early switch to CMIS technology is worthwhile. The tia® solution covers the entire range of archiving scenarios from application to storage, regardless of whether the IT landscape is operated completely on-premises, in the cloud or whether hybrid systems are in use. In the interplay with SAP, tia® acts like a middleware between the ERS system and the hierarchical storage management (HSM) system. This ensures legally compliant document archiving, data archiving and archiving of print lists via standard SAP interfaces.

"We are delighted that NTT DATA Business Solutions, the No. 1 provider of SAP-related services, has added our solutions to their product range," says Jochen Heybrock. "Our solutions are not limited to SAP, but encompass a wide array of applications. The streamlined architecture makes implementation easy, even more so because our solutions can be deployed across multiple operating models – all the way from on-premises to the cloud.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
