

Save costs with modern archiving

Whitepaper on innovative archiving concepts as well as the reduction of data graves, storage capacities and costs.

Neu-Isenburg, 18 February 2021 - The archiving expert KGS Software is now sharing its expertise with the public in the form of a free whitepaper. Interested parties can now download the ebook "Archiving Today" [here](#).

Archiving is one of the less popular tasks for IT administrators; in many cases it is even "in the blind spot". Yet archiving has long since become a strategic IT discipline.

The KGS white paper outlines examples of how a company should proceed in order to reduce the flood of documents and data to be stored, to use storage capacities efficiently, to save costs and ultimately to archive in a contemporary manner. In this context, the challenges of clustering sensitive, superfluous or redundant data as well as the art of transferring a heterogeneous data landscape into a flexible archiving concept are illuminated. In order to convey this complex topic as practically as possible, there are always concrete expert tips on the various aspects.

The USP of the white paper is the ROI calculation, which is an integral part of the eBook. Here it is calculated under which conditions the use of an intelligent archiving solution, such as tia® from KGS Software, pays off and what share the investment costs and the internal resource costs have in this.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner.
